## SUMMER INTERNSHIP Doyle Herman Design Associates LANDSCAPE DESIGN

Doyle Herman Design Associates creates extraordinary landscape design by integrating artistic expression within the contextual perspective of architecture. We are informed by historical traditions of the past yet inspired by modern aesthetics. Our approach to landscape design concerns deciphering, translating, and responding to a site and its physicality. Each project begins with a holistic evaluation of the intrinsic qualities of the environment and its relationship to human habitat. We engage with a team of affiliated professionals that includes architects, landscape contractors, and environmental consultants to design and implement a shared vision. Botanical diversity is examined and native, natural, and organic materials — including the facets of hardscape and softscape — are considered. At Doyle Herman Design Associates, we celebrate the merger of living and built environments to insure an innovative, detailed, and above all, beautiful landscape.

The Summer Internship Program provides an opportunity to gain fieldwork experience, work in a truly collaborative setting, develop interests in the materiality of landscape design and learn about office workings - permitting, submissions, planning approval processes and interaction with clients.

Responsibilities of the internship position will include, but not be limited to, AutoCAD drafting, fieldwork, submittal preparation, graphics and a variety of other tasks.

*This is a paid internship program and is highly competitive.*

## DEADLINE TO APPLY: MARCH 20, 2017

Please email requirements to [CAREERS@DHDA.COM](mailto:CAREERS@DHDA.COM) with the subject heading "2017 Internship".

### REQUIREMENTS:

- ◆ Resume
- ◆ Cover letter including a paragraph of goals and expectations of the internship program
